Tuesday 6th June, 11am – 12.30
Turing Seminar Room, Coupland One Building, University of Manchester

ALL WELCOME

Abstract

Assessing babies and young children at risk of communication disorders

Assessing the language levels of children is always a challenge. However it is particularly difficult for younger children who are at risk of communication disorders or those for whom language learning abilities might be difficult to ascertain. Dynamic assessments, parent report measures and narrative tasks are three ways in which some of the difficulties might be overcome. This presentation will address some of the conceptual aspects of measurement as well as describing some new research which is developing tools for these populations.

Directions

Coupland 1 Building is on Coupland Street, off Oxford Road, building 43 on the [Campus Map](#).
